Ship lay-up firms join to combine services

 **By Damian Brett**

The GAC group, Bibby Ship Management and DehuTech have formed a new partnership to offer ship owners, operators and management companies more options under their existing ship lay-up packages.

The new partnership means the companies will combine their services. Bibby will handle the technical and crew management involved when laying up a ship, DehuTech will cover the dehumidification aspect and GAC will provide its portfolio of solutions, including ship agency, supply services, fire, rescue and safety, lay-up preparation and documentation for maintenance and inspection.
